Customer Safety

We take this chance to remind all customers that you will not be allowed to enter our workshop area unless given authorisation by staff. Once authorisation has been given you are required to sign in and display the provided visitor tag clearly on your shirt.

Upon your next visit to us please take note of all the new Occupation Health and Safety signage positioned all around the premise, this is for everybody's health and safety so please abide by these.

Wishing our customers a very Merry Christmas and a safe and prosperous New Year in 2004.

From all of the staff at Tatiara Truck & Trailers.

Comments from the Manager:

After a warm November, harvest has come upon us early and threats of thunder storms catching even the most organised operators out but leaving some with unprepared vehicles.

The Transport SA inspectors will be showing there presence this year with more inspectors on the road. Only the best maintained vehicles have a chance of passing their high standards.

Tatiara Truck and Trailers are investing heavily in new equipment on order from Europe, to be installed early in

the year.

Brake Roller shaker slide slip tester and fluid dispensing measuring equipment part of the list.

We are very pleased with the performance of our new call-out vehicle—some days only switched off for a short time. On road repairs are now much more enjoyable.

From Ann, John, Jaime, Dylan and Staff of Tatiara Truck & Trailers we wish you a Merry Christmas and a Prosperous New Year.

John Jenkin

STAFF TRAINING

With ever changing technology it is essential that we send staff to as many training course as possible. Staff have attended a number of course over the past 4 months.

Daryl Fisher attended a Caterpillar training course at Mount Gambier on the 11-12 August. The course focused on the electrical components of the caterpillar engine.

Shawn Lawson & Stephen Pfeiffer journeyed to Melbourne for 1 week to attend basic and advanced parts interpreter training held at Paccar parts. Following these courses Shawn & Stephen can now efficiently interpret all customer's parts needs.

Adam Keller attended a air & brake course and a antilock brake course held at Kenworth in August for 5 days. The

air & brake course provided a basic understanding of the kenworth air system and air suspension systems. While the antilock brake course provided a basic understanding of antilock brake system and developed problem solving skills in both areas.

In October Dylan Jenkin and Adam Keller attended a Eaton auto shift course held at Mount Gambier. Dylan and Adam acquired an understanding of product concept, design and operation, as they learnt identification, dismantling, assembly and diagnostic techniques.

Early in November Dylan Jenkin attend a kenworth electrical course at Kenworth. As a result Dylan can now diagnose and repair faults associated with the electrical systems in a Kenworth.

5 YEARS FOR JAIME JENKIN!

Jaime began working at Tatiara Truck & Trailers on 19 December 1998. She came to us highly qualified with a TAFE certificate 2 in office & Clerical procedures. Jaime also had a good background knowledge of the business as her mother and father are the company directors. Jaime started in a service administration role, opening and invoicing job cards and general maintenance of the service paperwork. A position soon opened in our accounts department, which Jaime accepted the challenge of keeping

the business finances under control. Jaime is currently still in this accounting position, she organises payment for suppliers, manages all customer account enquires, organises weekly pay's for employees and many other duties. Congratulations Jaime on your five years.

If you have any queries on your account please contact Jaime on (08) 8752 0077

ROADWORTHY INSPECTION DATES

We have continued to book ahead inspections with Transport SA every fortnight. If you require an inspection, it is in your best interest to get in early as these positions fill fast.

If you require further work on your vehicle before an inspection please make a booking early so that we can order parts if required and make the necessary repairs.

For bookings or enquiries, please contact Donna on 8752 0076.

Listed are the future inspection dates:

- 1st December 2003
- 15th December 2003
- 12th January 2004
- 27th January 2004
- 9th February 2004
- 8th March 2004
- 22nd March 2004

WORK EXPERIENCE

We have only had two students here for work experience over the past 4 months. Luke Fisher from Bordertown High School came for 3 days in September. He carried out mechanical repairs, assisting our mechanicals with such jobs a brake re-lining and services. Sam Brown from Edenhope High School will be here for 1 week early December, he will be conducting his work experience in our workshop.

We have also had a class from Edenhope School here learning about career pathways. Staff members from the

workshop and office gave a brief speech on their specific job, they also went on a tour of our workshop.

Tatiara Truck & Trailers fully supports the work experience programs conducted throughout the school's. We encourage students to undertake as much work experience as possible in as many different occupations as possible. In doing so we hope to make students more comfortable with the workplace situation, and also given them more understanding of what the "real world" is like to work and live in.

TECHNICAL TIPS

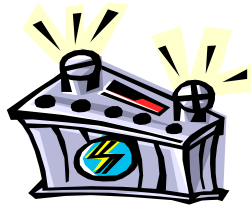

Causes of Battery System Malfunction

Excessive Heat—High temperatures quickly corrode positive plates and dry out battery cells.

(Cold) Weather—Thickened engine oil makes engines harder to crank placing a heavier and longer lasting drain on the battery.

Vibration—If a battery is loosely fastened to the vehicle frame the resulting vibration can shake the active material from the plates.

Fast Charging—High voltage charging can damage the battery if it overheats and begins giving off gases (the battery isn't the only thing that can be damaged because these gases are explosive).

Repeated Draining—Constantly draining a standard battery (deep cycling) builds up deposits on the plates. Eventually the deposits get so thick the battery can't accept a charge.
