## Johns Corner

The good opening rains this season have been promising and local farmers have been busy over the last month or so putting in this year's crops. Here's hoping that the weather keeps on our side this year as there is always a good flow on for the industry.

In the last couple of weeks there has been major activity in our yard while we have been finishing off the sealing following the extension of the workshop & parking area on the southern side of the premises. This took a bit of time as we were conscious of getting the water flowing in the right direction to alleviate maintenance issues later on. It's good to see the yard clean & tidy once again & will certainly alleviate the amount of dust in the workshop & office areas.

In between jobs, we have been building a new centralised tool room to house equipment & specialised tools & help to keep them in order - I can't wait to see it finished!!

Tatiara & surrounding districts could be called the "food bowl" for Australia with the amount of produce that is being transported in & out of the area (onions, potatoes, carrots, lucerne, oats, grains, sheep & cattle). This certainly reinforces the importance of location & services provided from businesses such as ours to help this continuing & the

trucks moving 24 hours, seven days a week. The introduction of the tyre service has certainly been a good decision in limiting the down time of these transporters as well.

Another project on the go is the restoration of my father's International truck which I'm hoping to take to this year's Transport Hall of Fame in August. This is certainly a treasured memory as it was the vehicle used to pick me up from hospital after I was born, 60 years ago nearly to the day. Hopefully in the next issue, we will have some photos to share!!

Planning for the office & spare parts extensions are underway once again & hopefully over the next few months we will make some headway so that this next major project can start next year some time. This will certainly alleviate some growing pains we have, improve efficiency & enable better stock control.

I would like to make special mention & acknowledge the special presentation that was made to the Harrold family at the SARTA dinner in March this year, awarding Jim Life Membership to honor & thank him for his years of dedication to SARTA & the industry.

Regards

*John Jenkin*

# Jenkin Racing Team Says Farewell

After nearly 25 years of racing the Jenkin family have decided to park the race cars. It is now time to focus more time and energy towards family and business life.

We have achieved a lot as a racing family, including State title win & series wins. We have also won best presented crew, car & transporter at the Warnambool classic, Rookie of the year in sprintcars and WSS, but more importantly we did it as a family bringing that side of racing to one of the toughest tournaments in the world. We also brought a level of sportsmanship to be proud of while, and while we didn't win heaps of major races we did come very close & made many friends along the way.

Dylan & family would like to take this opportunity to thank all loyal sponsors, supporters and friends for the many years we shared together.

## Staff Training

We are full swing into this years training schedule with several employees working on their online based training and others attending various courses.

Will Johnson, Todd Watson, Zac Ansell, Brett Jenkin & James Hooper attended a Kenworth level 2 suspension, steering & EBS course here at our training facility at the beginning of May.

Owen Butler has completed the Cummins ISX15 871 & 871E training course in Adelaide.

During May Paul Croser completed Detroit DDEC IV Diagnostics & DD15 Major repair while Russell Twigden completed the Detroit diagnostics courses. All achieving outstanding results..

Donna & Narelle attended a visual merchandising course at the local Tafe to aid them in improving the visual appearance of our showroom display area.

All training courses attended are of high standard so that our technicians have the best knowledge available to keep your vehicles on the road.

## Dunlop Super Dealer Conference

At the end of March Dylan & Michelle attended their first ever Dunlop Super Dealer conference, held in Nadi, Fiji. They had a great time meeting new people, etc. Dylan came away with many new ideas of safety and tyre maintenance.

Also the Dunlop Super Dealer group were involved in raising money and building seating for a primary school on the outskirts of Nadi, which Dylan & Michelle found to be a very humbling experience.

## Staff News

Congratulations to Owen Butler on completing his apprenticeship. Owen is now a fully qualified diesel technician. Well done Owen.

At the beginning of June we will farewell Steve Grellet from our spare parts department. Steve has been part of the team for 10 Years and we thank him for this. Steve will be running his own business and we wish him all the best.

Qualified Diesel Technician

# Showroom Revamp

After completing a visual merchandising course Donna & Narelle have busy been putting their new knowledge to the test by remodelling our showroom. They have come back with many ideas on how to improve the display of our stock so that it is much easier for you, the customer to locate what you are looking for. There will be new signage and labelling in an effort to make our showroom easier to navigate.

## Pre-Harvest Checkovers

This time of year is a great opportunity to book in your equipment for pre-harvest check overs. This will enable ample time for staff to check over your equipment and let you know what needs to be done to ensure that you have a hassle free harvest this year.

For enquiries or to make a booking please contact our service department on (08) 8752 0077 ext2.

## Privacy Policy

March 2014 saw some updates to Australia's privacy laws and as part of TTTs mission to provide customers with a quality service that is responsive and communicative to their needs, we have developed a transparent privacy policy which can be viewed when visiting the TTT website.

I felt it was important we communicate how we handle personal information as customer's privacy is important to us. The Privacy policy details how we collect, use, disclose, transfer and store your personal information. You will also be pleased to know we now train staff with our privacy expectations and have also upgraded our cyber security to ensure it maintains its high standard of protecting your personal information.

If you haven't already done so, please take a moment to familiarise yourself with our privacy policy practices and let us know if you have any questions.
