

KENWORTH GENUINE CLEANING RANGE

AUSTRALIAN MADE. WORLD'S BEST.

MADE FOR YOUR KENWORTH

Every Australian Kenworth produced since 1971 is classic, unique and with the right care will be admired long into the future.

So whether it be brand new, or over 40 years old, taking care of your Kenworth is now easier than ever with the Kenworth Genuine premium range of cleaning products.

Specially formulated using latest technologies, and tested on factory-first paint and finishes, the Kenworth Genuine cleaning range is your assurance that you are protecting your investment to the highest standard, to be admired for many years to come.

Made in Australia, for Australian conditions the Kenworth Genuine cleaning range is simply made for your Kenworth.

KENWORTH GENUINE CLEANING RANGE

Kenworth owners take pride in keeping their rigs looking great. The comprehensive range of Kenworth Genuine Cleaning products make it even easier to keep your truck gleaming.

With the inclusion of ceramic Silicon Dioxide (SiO₂) technology and specifically formulated to be used on Kenworth trucks, the range of cleaning products are the industry's most advanced.

Two high tech Kenworth Genuine wash products are available with powerful cleaning abilities:

- Kenworth Genuine PRO Wash
- Kenworth Genuine Wash & Wax

Two advanced Kenworth Genuine finishing products are available that provide a deep gloss, silky smooth finish and UV protection:

- Kenworth Genuine Spray Wax
- Kenworth Genuine Ceramic Spray Sealant

Rounding out the Kenworth Genuine Cleaning range are the 'no-sling' Kenworth Genuine Tyre Gloss and non-flammable, low caustic Kenworth Genuine Degreaser.

WHAT IS SILICONE DIOXIDE (SiO₂)?

Silicon Dioxide (otherwise known as quartz) is a naturally occurring mineral that is the main ingredient in the manufacture of glass. In an automotive sense, Silicon Dioxide is most commonly used as a basis for ceramic coatings and paint protection under its chemical name "**SiO₂**".

SiO₂ contains extremely strong nano polymers that bond almost instantly to painted surfaces to create an extremely durable protective barrier. This barrier provides resistance against environmental contaminants and harsh UV and creates an extremely hydrophobic (water beading) surface. The Nano particles easily fill microfine imperfections within the paintwork which creates a much deeper gloss and incredibly smooth surface.

Material Safety Data Sheets

Material safety data sheets (SDS) are available for each of the Kenworth Genuine Cleaning products. The SDS can be accessed on the PACCAR Parts website via the QR code to the left.

KENWORTH GENUINE WASH & WAX

A unique formula for maximum gloss and shine.

Kenworth Genuine Wash & Wax is our flagship wash product.

The powerful formula in Kenworth Genuine Wash & Wax combines a robust wash gel with the highest quality synthetic waxes and silicon dioxide (SiO₂) to produce a super hydrophobic, slick and incredibly high gloss finish with supreme cleaning abilities.

Combined with SiO₂, our synthetic wax formulation produces a higher gloss, slicker feel and more durable protective coating over the vehicle than standard carnauba wax. Synthetic waxes have a much stronger bond to paint and are easily stackable, meaning the more often you apply it, the more durable it becomes.

Available in convenient package sizes to suit your needs, give your Kenworth the best with Kenworth Genuine Wash and Wax.

- Super concentrated yellow wash & wax gel
- High level of synthetic waxes coupled with SiO₂
- Highest content of active solids
- Ice fragrance
- Dilutable up to 200:1
- pH neutral
- Water based and biodegradable
- Triple interceptor safe

WASH & WAX

PART NUMBER	SIZE
Y99-KW-1001-1L	1 Litre
Y99-KW-1001-5L	5 Litre
Y99-KW-1001-20L	20 Litre
Y99-KW-1001-200L	200 Litre

KENWORTH GENUINE PRO WASH

A super foaming concentrated wash gel.

Kenworth Genuine Pro Wash is a concentrated super foaming wash gel in the iconic Kenworth Red colour, coupled with the popular Ice fragrance. It can be used via a high-pressure foam cannon, low pressure foam gun or standard bucket wash.

With its extremely high solid content compared with conventional truck washes, the higher level of active components means Kenworth Genuine Pro Wash has a dilution potential ratio up to 200:1. Wash performance is better on traffic film, insect spatter and exhaust soot than traditional truck washes.

When used through a foam cannon, Kenworth Genuine Pro Wash creates a thick, shaving cream-style foam that clings to the vehicle. After a few minutes, the foam will begin to slip down the vehicle body as it encapsulates and loosens the dirt, carbon and other road grime. Kenworth Genuine Pro Wash is then rinsed from the vehicle, removing heavy, scratch-producing soils.

It is also an excellent touch-free wash for lightly soiled vehicles or a highly effective pre-soak before washing by hand. Convenient pack sizes to suit your needs, a great clean is easy with Kenworth Genuine Pro Wash.

- Concentrated super foaming gel in iconic Kenworth Red
- Ice fragrance
- Does not contain waxes
- Protects against rust with corrosion inhibitors
- Dilutable up to 200:1
- pH neutral
- Biodegradable
- Triple interceptor safe

Y99-KW-1000-5L	5 Litre
Y99-KW-1000-20L	20 Litre
Y99-KW-1000-200L	200 Litre

KENWORTH GENUINE SPRAY WAX

A hyper-concentrated synthetic spray wax.

Kenworth Genuine Spray Wax is a hyper-concentrated synthetic spray wax which is engineered to produce the highest possible shine to your vehicle's paint.

Combined with silicon dioxide (SiO₂), our special synthetic wax formula produces a higher gloss, slicker feel and more durable protective coating than standard carnauba wax.

It is extremely versatile in its range of applications. Use on dry paint as a spray and wipe, foam onto wet paint and hose off for an easy spot-free rinse after washing or spray onto a wet vehicle and chamois dry for an amazing soft finish.

Shine above the rest with Kenworth Genuine Spray Wax!

- Hyper concentrated
- Contains SiO₂ and synthetic waxes
- Dilute to 100:1
- High gloss and UV protection
- pH neutral
- Water based and biodegradable
- Triple interceptor safe

Y99-KW-1002-1L	1 Litre
Y99-KW-1002-5L	5 Litre
Y99-KW-1001-20L	20 Litre

KENWORTH GENUINE CERAMIC SPRAY SEALANT

A new level of gloss using ceramic quartz technology.

Kenworth Genuine Ceramic Spray Sealant utilises Silicon Dioxide (SiO₂) nano ceramic quartz technology to provide a durable sealant in a spray and wipe application. The unique advanced polymer formulation creates a coating with high gloss ('wet-look'), a silky smooth finish, superior water repellence and UV protection.

The premium SiO₂ technology in Kenworth Genuine Ceramic Spray Sealant provides protection against environmental contaminants and UV while maintaining its extreme hydrophobic (water repellent) qualities for easy ongoing maintenance and cleaning. Having a slick hydrophobic finish means water beads and sheets off vehicle surfaces minimising the amount of road grime clinging to the vehicle, therefore making it easier to clean.

For the ultimate finish, use with Kenworth Genuine Wash & Wax and Kenworth Genuine Spray Wax to stack glossy layers for even more durability and shine.

You can never have too much gloss!

- Ready to use
- Ceramic protection against UV and road grime
- Provides silky smooth and deep gloss finish
- Can be used on all exterior surfaces
- pH neutral
- Water based and biodegradable
- Triple interceptor safe

Y99-KW-1003-5L	5 Litre

KENWORTH GENUINE TYRE GLOSS

A water based gel providing a great natural sheen.

Kenworth Genuine Tyre Gloss is a non-flammable water-based gel that produces a natural sheen to tyres, exterior plastic, rubber, mudguards and mudflaps.

Being water-based, it produces a dry film that avoids the 'silicone sling' that conventional solvent-based tyre dressings produce.

Kenworth Genuine Tyre Gloss' special formula also helps to restore faded plastics as well as minimise re-fading due to its UV protection properties.

Kenworth Genuine Tyre Gloss, for the best all round sheen.

- Ready to use
- Water based
- Non flammable
- pH neutral
- Produces a natural sheen
- Can be used on tyres, exterior plastic trim, mudguards and mudflaps

KENWORTH GENUINE DEGREASER

A highly concentrated solution for grease & grime.

Kenworth Genuine Degreaser is a heavy-duty concentrated, low-caustic degreaser designed for the quick removal of grease, grime and stubborn road film from engines, chassis and bodywork.

Kenworth Genuine Degreaser is also ideal for all general workshop degreasing and workshop floor cleaning purposes.

The unique blend of alkalis, surfactants, natural solvents, and sequestering agents in Kenworth Genuine Degreaser allows maximum removal of soils with minimal effort. The low caustic formula provides good emulsification of oils and greases and does not take your breath away when using the product. Application can be via spraying, brushing, wiping, or foaming onto surfaces.

- Highly concentrated
- Dilutable up to 50:1
- Water-based
- Low caustic
- Non-flammable
- Biodegradable
- 'Quick Break' product that's triple interceptor safe

FAQ

1. What makes the Kenworth Genuine Cleaning Range different to what is currently available?

Technology in chemistry has evolved considerably, particularly in synthetic polymers and detergents. The Kenworth Genuine range optimises the latest ingredients resulting in more concentrated formulations that are softer on paintwork, plastics and alloys than traditional truck-washing products.

2. What is Ceramic SiO₂ technology and what are the benefits?

SiO₂ or Silicon Dioxide is the main ingredient in the manufacture of glass. Taking this and combining it with Nano Synthetic Polymers creates a durable protective coating that resists environmental contaminants and harsh UV. It also creates an extremely hydrophobic (water-repelling) surface. These microscopic polymers provide a much smoother finish creating a higher gloss on all surfaces.

3. What are the differences between the two wash products?

The core structure of both washes is similar in utilising the latest synthetic detergents and in the level of concentration. The Kenworth Wash & Wax though has the added benefit of containing SiO₂ and high levels of synthetic wax. Synthetic Wax has been used as it outperforms natural waxes such as Carnauba and Bees Wax in durability and gloss level.

4. The Kenworth Spray Wax & Kenworth Ceramic Spray Sealant are new. What are the benefits of using these products?

Both of these products are used after washing the vehicle and to further enhance the gloss and the protective coating.

Spray Wax is a highly concentrated Synthetic Wax. Adding this product results in an instant water beading and high gloss finish to the surface. Drying the vehicle is also much easier.

The Ceramic Spray Sealant is the optimum in providing a super glossy, silky finish to any surface. Vehicles will remain cleaner for longer and subsequent cleaning is much easier. It can also be used as a spray to remove light dust and road grime without the risk of scratching.

5. What about the environmental and OH&S considerations of the Kenworth Range?

All of the products are biodegradable and phosphate free. They can also be used where interceptor pits are in use. Washes are pH neutral, non-acid, non-alkaline and non-corrosive and do not contain harsh ingredients.

The Kenworth Tyre Gloss is a Water Based Emulsion, completely nonhazardous, non-flammable and doesn't "sling off" silicone onto the vehicle.

6. Can the Kenworth Cleaning range be used on other vehicles?

Yes. Many Kenworth Truck owners have other vehicles to look after. We have ensured that all surfaces such as acrylic, highly polished alloys and chrome, plastic, rubber, wood, canvas etc. are cleaned and rejuvenated safely.

AUSTRALIAN MADE. WORLD'S BEST.

The Kenworth Genuine Cleaning products are available exclusively through the PACCAR Parts dealer network across Australia and New Zealand.
