He added “The support we have had from our customers has been really positive and we are truly grateful for all of there support. We look forward to improving our relationships with all of our existing customers and building new relationships in the region as we continue to support the transport industry across Gippsland; ensuring our customers have the best access to quality parts and in turn their trucks have maximum uptime.”

### WHAT IS A DC/DC CONVERTER?

A DC/DC converter takes a range of input voltages (such as 12V, 24V, or 48V) and delivers a single, stable output voltage. This ensures that sensitive vehicle electronics - like infotainment, safety systems, Trailer EBS, and controls - always receive the correct power, regardless of battery fluctuations.
